Maple Oak

Chocolate

Shamrock

The appearance of the colors on this chart may be affected by the type and quality of the light and angle from which it is viewed. The colors may also shift by batch, with age, exposure to heat and exposure to UV light. In addition, the texture and absorption of the surface to be coated may affect the appearance of the color in the finished project. We strongly recommend the creation of a job site sample panel before application. For warranty information, please visit our website.
